

DESCRIPTION

DCTF (DSG) protects clutches and sustains consistent launch and anti-shudder durability for the lifetime of the transmission. It ensures performance at low temperature for the mechatronics, protection at high temperature for the gears and heat dissipation for the clutches and gears.

SUMMARY OF BENEFITS

- Protection of the transmission against wear and corrosion
- Heat dispersal for the entire system
- Lubrication of the clutches, gears, shafts, bearings and synchronisers plus excellent torque retention
- Hydraulic actuation of the clutches and gear change
